Effective IT Demand Management

Clear project justification and benefits realization for rationalized decision making.

IT Demand Management can be hard, but edison365 believes that it doesn't have to be. We have found that inconsistent processes, lack of transparency, project justification, and benefits realization as being some of the major challenges that prevent the IT Department from running smoothly and cost efficiently.

The edison365 suite brings simplicity to managing the incoming requests and tracking progress. edison365 is a software solution that centralizes requests, communication, project evaluation, and accountability all in one easy to use tool that's built on your Office 365 investment.

IT business objectives	How edison365 helps
Lower IT Operational Costs	Spending less time and resources on getting IT projects through the pipeline ultimately lowers costs. The edison365 suite will also allow you to calculate what projects will really produce value, letting your team prioritize the higher value-add efforts.
Centralized View & Transparency	With just one process for intake, you will see what's in the IT project pipeline and who's responsible for the next step. No more lost spreadsheets and accountability issues.
Faster Evaluation	We've streamlined the IT project evaluation process so that you don't get caught up in the minutiae. A simple process is much more likely to be followed and get IT projects to the finish line faster.
Risk Reduction	When you can properly calculate the true resources needed and costs associated with future IT projects, you can properly mitigate risk. You can also make better decisions about what projects will be worthwhile.
Engagement & Collaboration	The intuitive user experience will encourage employees to submit ideas/requests and even rate other's submissions. The act of giving employees an easy way to submit their ideas increases employee engagement and team collaboration.

"Getting end users to adopt new technology solutions is always a challenge – even when it is in their own best interest. Because edison365 is built on Microsoft Office 365 (the productivity solution for 92% of our customers) there is little to no end-user obstacle. This helps drive adoption and accelerate value delivery."

Magnus Holmlid, CEO & Founder, Visuell Plannering

Successfully manage your IT resources and demand with our comprehensive and easy-to-use software suite

Centralized intake for requests

One project request intake location and process to prevent requests and attachments from getting lost.

Optimized business case approval

Set target timescales for each approval stage. Easily assign reviewers and discover where (and with whom) a case has stalled.

Clear data visualization

Configure standard dashboards to present large amounts of information efficiently. Users can switch between multiple visualizations to allow effective engagement with data.

Drag-and-drop business case templates

Build the perfect template for the size or type of case required and configure stages to align with your internal processes.

Personalized access

Variable views depending on individual permissions and approved rights. Your personal page keeps track of what needs approving and what stage each request is in.

Portfolio Modeling

Easily perform 'What if?' scenario planning to manage resource demands. Compare multiple scenarios and determine which projects to move forward.

Comprehensive management reporting

Completely transform your Project Online reporting, using provided templates for a range of standard reports such as a status or highlight report at both project and program level. Use the existing templates, customize them, or create your own.

Seamless planning

Integrated scheduling using Microsoft Project, Project Online, and Microsoft Planner. Build and control projects either online or offline with the shared scheduling engine. The familiar UI reduces time spent learning new tools.

Comprehensive device access

Use multiple devices to access information; Windows, iOS, and Android.

Financial management

Manage all project financials in one location including budget, forecast and actuals including income, benefits and ROI.

The end-to-end business transformation platform built on Office 365

The edison365 suite provides a unique and comprehensive platform to accelerate business transformation. Each module can be used standalone or alongside one or more of the other modules in the suite to provide an end-to-end solution.
